

## HX7610TA Hydraulic Comparator

### Product Description

HX7610TA Hydraulic Comparator consists of hand pump, lead screw, shut-off valve, relieve valve, transparent oil tank and output interface. It is a solid rugged structure which features its high sealing performance, stable and fast pressure generating, effort-saving and easy operation. it is an ideal substitute for the dead weight tester.

### Functions

HX7610TA Hydraulic Comparator provides pressure for calibrating pressure gauges, such as pressure (different pressure) transmitters, precision pressure gauges, general pressure gauges and other pressure instruments. It can be widely used in power, chemical, metallurgy, petrol, metering, military industry etc.

### Characteristics

- Stainless steel, hermetic technology in the military industry.
- Fast connection, quick pressurizing and convenient cleaning
- It is used for calibrating all kinds of oil gauges
- It has secondary oil filter and a settler. The waste oil can be filtered by this duplex oil tank.

### Technical Specification

Pressure range	(0~600)bar/(0-720)bar
Stability	0.05%F.S
Working medium	25# Transformer oil
Output interface	M20*1.5 Female
Dimension(L×W×H)	450mm×420mm×200mm
Weight	18kg
